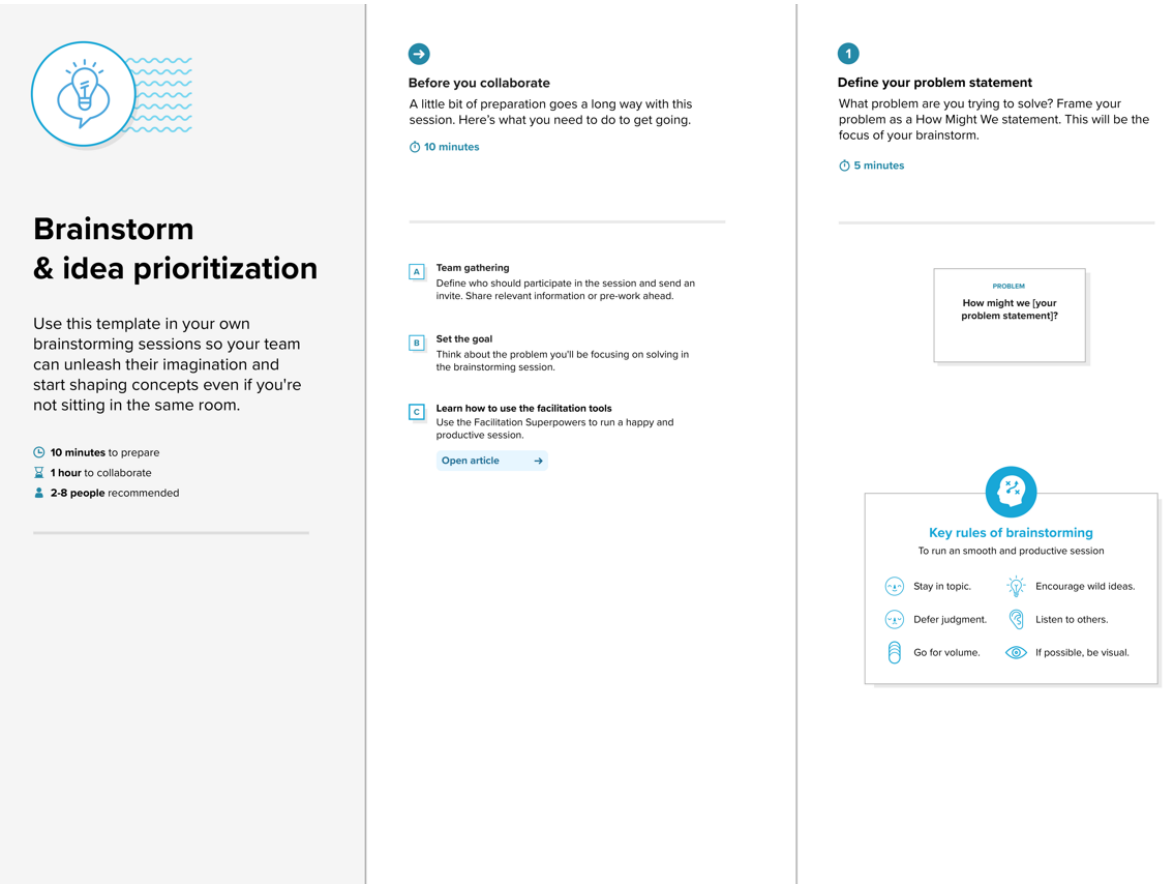
Brainstorm & Idea Prioritization Template:

To solve the problem of difficulty in interpreting financial statements, several practical ideas were generated. These included AI-based financial report summarization, automated financial ratio calculation, visualization of financial trends, risk detection from balance sheet data, and conversational financial assistance.

After evaluating feasibility and impact, the team decided to focus on an AI-powered financial analysis system that can process Balance Sheet, Profit & Loss, and Cash Flow statements and generate structured insights. This solution directly addresses the challenge of understanding complex financial data while remaining achievable within the project scope.

Step-1: Team Gathering, Collaboration and Select the Problem Statement



Step-2: Brainstorm, Idea Listing and Grouping
