Acceptance Testing
UAT Execution & Report Submission

Date	18 Feb 2026
Team ID	LTVIP2026TMIDS77563
Project Name	Gemini Financial Decoder
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to summarize the testing coverage, validation results, and system stability of the **Gemini Financial Decoder** application at the time of User Acceptance Testing (UAT).

This report confirms that the **financial data upload module, AI-based financial analysis module, and visualization module** were tested according to defined system requirements. The testing process verifies that the system correctly processes financial statements and generates structured financial insights using the Gemini AI model.

The report also highlights **test case execution results, defect analysis, and system reliability** before final project submission.

.

2. Defect Analysis

2.1 Functional Coverage Summary

Section	Total Cases	Not Tested	Fail	Pass
File Upload & Validation	4	0	0	4
Financial Analysis (AI Processing)	5	0	0	5
Data Visualization	3	0	0	3
API & Error Handling	3	0	0	3
Total	15	0	0	15

2.2 Bug Resolution Summary

During development of the **Gemini Financial Decoder**, minor issues were encountered and resolved during implementation and testing phases. No critical or unresolved defects remain in the final version of the system.

Resolution Type	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
Fixed During Development	0	1	2	1	4
By Design (Expected Behaviour)	0	1	0	0	1
Duplicate	0	0	0	0	0
Not Reproduced	0	0	0	0	0

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested

Module	Total	Not Tested	Fail	Pass
Balance Sheet Upload & Processing	2	0	0	2
Profit & Loss Analysis	2	0	0	2
Cash Flow Analysis	2	0	0	2
AI Financial Summary Generation	3	0	0	3
Data Visualization Charts	2	0	0	2
API Key & Error Handling	2	0	0	2
Total	13	0	0	13
Module	Total	Not Tested	Fail	Pass

4. UAT Conclusion

The Gemini Financial Decoder application successfully passed all functional and stability test scenarios.

• The system correctly accepts and processes Balance Sheet, Profit & Loss, and Cash Flow statements uploaded in CSV or XLSX format.
• The Gemini AI model generates structured financial insights and ratio-based analysis from uploaded data.
• Data visualization modules display financial trends using charts and tables.
• Error handling ensures invalid files or missing data are handled safely without system failure.
• API communication remained stable during repeated testing.
The system is considered **stable, reliable, and ready for deployment/release**.
